SUMMER COURSE 2015

Class 1

2015 Summer school is over and only precious memories of class 1 would most likely remain in our hearts. The first day of summer school was quite challenging for us, there were excited and bubbly kids and some were hesitant and threw an unstoppable tantrum. But, gratefully after introducing activities that seemed interesting, motivating, and doable, they've learned to feel comfortable in their new setting and became active participants in the class. The seven weeks summer program was great for the kids. Each week, we had a different theme and activities that went along with the theme of the week, like arts & crafts, outdoor plays & various sports, cooking & baking, singing & dancing, and other enrichment diversions that made their summer filled with adventure, learning and fun.

This year's summer school had really helped these kids grow, build self-confidence and independence, developed skills enthusiastically and most importantly changed their perspective about schooling in a positive way.

This is by far the best summer school ever.

Cheers, T. Almie + T. Anna & T. Tookta

Class 2

It is my great pleasure working with your child this summer class 2015. On the first day of summer it was a challenge for us to handle them. The children were so excited, interested and motivated in participating the different activities we had prepared. Each week we had different themes and activities that we went through such as collaborative arts and craft, outdoor games, singing, cooking, sports, dancing and acting which made their summer full of excitement, and colourful adventures suited for their learning.

The summer class became successful since children had developed their ability in socializing and learning with each other, gained self confidence and enthusiasm on discovering their talents and skills.

T. Jane & T. Dor

Class 3

For this summer, our class went thru a lot of fun-learning activities. In the first week, we had fun singing. Second week, we prepared healthy and mouth-watering dishes. Third week, it is all about colors. Fourth week, we learnt to act. Fifth week, the kids had to compete with other kids thru sports. Sixth week, (Yepee!) off we went to Nongkhai Aquarium. Clearly, this was *THE MOST EXCITING AND MOST AWAITED WEEK* for the students. And we ended the summer school with a bang with our *Camping Theme*. This summer school helped prepare our students to be school-ready using various educational and inter-active learning.

T. Jumar dela Cruz & T. Somneuk

Class 4

Rain or shine. Twelve enthusiastic students of Class 4 never did stop believing on beating the dry and wet in summer class. Different challenging activities they have partaken and done the with flying colors. Hooray!!!! Two Thumbs up! 🍌🍌

Leading group is a motivating task they have coped with for this summer. Class 4 has blazed the trail towards the significance of *GROUP*. They managed to meet up to the mark on working their math and language dynamic tasks and developed a genuine camaraderie with their group mates. As the popular saying goes by, "Unity is strength".

Get along with each other
Respect everyone's opinion
Offer support and ideas
Use soft voices
Participate actively
Stay together as a team
